HANDY TIP:

1. How does Westlink work?

Westlink is received by satellite. There is a dish on the roof.

A cable from the dish goes to the Satellite Receiver (VAST SatBox) near the TV.

The SatBox is then connected to the TV via an ADMI (best quality) or AV cable.

The SatBox has an authorization smart card inside. This has been activated by Westlink for you.

If you have turned the SatBox off for an extended (2 weeks or more) of time, the authorisation will lapse.

If this happens, call Westlink or follow this procedure:

1. On the internet, search for VAST REHIT or go to <http://www.mysattv.com.au/decoderrehit.aspx>
2. Enter your smart card number and press REHIT. After a few minutes, you will receive the signal.
3. Be careful when replacing the smart card. Make sure it is in the slot.

TIP: Make a label with the Smart Card number and fix it to the SatBox.

Westlink is available to all viewers who receive their Free to Air TV via Satellite, on Channel 602.

There are over 65,000 sites all over WA who can receive Westlink.
